

In March of 2020 the COVID emergency hit and the gym closed in response to restrictions by the Governor Of Pennsylvania. That closure lasted three months and we reopened in June. Since then the gym has offered hundreds of classes accounting for thousands of visits to the gym without incident. Clearly, Oaks Gymnastics is not driving the current increase in infection.

By design our programs are intended to SHIELD our students from harmful influences in the “outside world”. We want the gym to be a sanctuary free of violence, aggression, prejudice and bullying. We want every child to have an even chance to succeed in a friendly and supportive environment. And now we want it to be a safe place where they can enjoy their childhood while the COVID emergency rages.

Here’s what to expect:

The Oaks Gymnastics Academy will meet or exceed all of the restrictions and requirements put forth by the CDC and the State.

Parents are asked to pre screen their child for any sign of illness such as, fever, sore throat/cough, and any loss of taste or smell. If your child is unwell please stay home.

We have a very clean bathroom and we sanitize often, but NO public bathroom is safe. Please be sure to change clothes and use the bathroom at home... NOT at the gym.

All of our students are screened again before class for TEMPERATURE and any sign of illness.

Hand sanitizer is in use before, during and after every lesson. Hand washing, too.

All of our classes will be MASK ON for as long as that requirement is in place. Face mask / covering is required by the students arriving and departing, too. It's just a few steps from the car, but the opening for the door brings everyone closer than is safe.

**WEAR A MASK. ALL THE TIME.**

We offer carefully planned lessons with LIMITED contact or ZERO contact. Students are asked to maintain physically distance whenever possible.

We sanitize high touch surfaces and the gym kept spotlessly clean and well organized. The facility has wide open spaces and excellent ventilation.

Class time has been staggered to avoid any "mingle" between classes.

Class size has been CUT so there are a few less students in the facility and parents are encouraged NOT to wait inside the building unless emotional support is needed.

At The Oaks Gymnastics Academy we believe that our programs build stronger people in MIND, BODY and SPIRIT. We want to provide a environment where your child can reclaim their childhood. When so much has been lost to COVID, we want the kids to have a safe haven to just be kids.

With your help we intend to meet that challenge.

The COVID 19 emergency is far from over.

Did you have visitors that are outside your immediate family? Did you travel?

You should get tested for COVID 19 or quarantine.

Keep your community safe.

Do the right thing. Keep everyone safe.
